

MOVIUS MULTI-LINE SOLUTION

The Movius Multi-Line Solution is a cloud-based service that makes it easy to add a business-managed number to a corporate or personal (BYOD) mobile phone. Employees can now carry one phone while keeping their work and personal number and activity completely separate, with powerful capabilities providing cost savings, control, compliance and simplicity to the business.

Employees can now have a designated business number on their existing device to place and receive business calls and texts, while keeping their primary number for personal use. This is achieved without the need for an additional SIM and/or phone, or any change to the employee's existing mobile network.

Movius balances corporate control and cost savings with advantages that make the service attractive to employees as well.

VALUE TO THE BUSINESS:

COST SAVINGS

Cut overall mobility costs by spending less on devices, infrastructure, management, support and services.

CONTROL

Ensure that business is conducted on work not personal numbers to protect company information and relationships.

COMPLIANCE

Strengthen and simplify compliance with regulations that affect business communications and activities on mobile devices.

SIMPLICITY

Manage and grow a mobile workforce quickly, easily and with a less complicated technology infrastructure.

VALUE TO THE EMPLOYEES:

CHOICE

Employees keep the phone they love and the service plan that works best for them.

CONVENIENCE

No more dual-device hassles. Employees carry one phone for work and personal use.

PRODUCTIVITY

Employees can work more flexibly and effectively at any time and place.

PRIVACY

Personal mobile use and data are completely separate and invisible to the business.

FEATURES OVERVIEW:

Movius makes it simple to manage your mobile business communications on a single device no matter what end-point strategy you have: BYOD, COPE, EMM/MDM, or a hybrid.

MOVIUS APP FOR EMPLOYEES

It's a full-featured work phone in a simple mobile app. Employees can communicate on a designated business line that's compatible with any carrier network and with any iOS or Android smartphone.

Full-Featured Work Phone:

Separate dialer, contact list, caller ID, voicemail, SMS and call logs, "Do Not Disturb" and scheduler.

Carrier Agnostic: Works across carriers on the device employees use now. No need to switch phones, plans or carrier to get started.

Stay-Connected Coverage:

Ensures the highest call quality and availability through all channels: cellular voice, mobile

data, and Wi-Fi so employees can take care of business wherever they are.

Mobile Recording: Enables call recording and text logging at an individual or group level to satisfy compliance obligations.

Global: Supports local numbers from other countries for employees who travel internationally.

Multi-Line Capability: Allows multiple domestic and/or international numbers to be used at the same time.

Secure: Works seamlessly with leading enterprise mobility management (EMM) solutions to protect company information.

Easy to Use: Simple, intuitive interface for a positive employee experience that doesn't require special training.

MANAGEMENT PORTAL FOR IT

Enterprises can centrally manage all company phone numbers and settings through a simple-to-use web portal that also delivers real-time insights into mobile usage.

Number Provisioning

Provides complete control over company numbers so they can be assigned and reclaimed in seconds.

Mobile Analytics

Tracks data, text and voice usage on the business line to better control mobile costs and simplify employee reimbursement.

Policy Management

Allows features on the Movius App (e.g. Mobile Recording) to be turned on or off to satisfy company or regulatory requirements.
